[illegible]

If I haven't got cancer by now I'll never get it. I just don't want to know. No one in my family ever had cancer. My husband told me not to worry. It was going to go all right. I remembered the golden needed feeding. It was raining out, and I was afraid I'd get sick on the way. I overslept and missed my appointment. Who cares. I don't have a doctor. I feel fine. I missed the bus. The canary got out so I chased it around for hours. I forgot. I had to get a haircut. The kids wanted ice cream first. The traffic was terrible. The weather was great so I played golf instead. I'm not sick, ever. I don't have the money right now. If cancer's in the stars, it's in the stars. I went to the doctor's on the wrong day. I went to the wrong doctor's. Maybe next week I'll make it. It's against my religion. I might need to lose a few pounds first. I'm too busy right now. I don't want to fall apart without me. My father died of cancer. He lived until he was 80. I don't care about it. Nothing's wrong with me. I'm not sick, ever. I don't have a doctor. I feel fine. I missed the bus. The canary got out so I chased it around for hours. I forgot. I had to get a haircut. The kids wanted ice cream first. The traffic was terrible. The weather was great so I played golf instead. I'm not sick, ever. I don't have the money right now. If cancer's in the stars, it's in the stars.

Stop excusing your life away.

I took a button that I found at a football game on. By the time they find it, it will be too late. I was doing laundry. I did it every day in my life. Cancer of the what? Doctors are boring. In my business I need every hour of my life. I can't afford to miss a day. I had to find it. It was hunting season. My clothes were at the laundry. I feel great. It upsets me to talk about it. The kids would ruin the house apart if I went out. I don't know why. If I haven't got cancer by now I'll never get it. I just don't want to know. No one in my family ever had cancer anyway. My husband told me not to worry. It was going to go but I remembered the golden needed feeding. It was raining out, and I was afraid I'd get sick on the way. I overslept and missed my appointment. Who cares. I don't have a doctor. I feel fine. I missed the bus. The canary got out so I chased it around for hours. I forgot. I had to get a haircut. The kids wanted ice cream first. The traffic was terrible. The weather was great so I played golf instead. I'm not sick, ever. I don't have the money right now. If cancer's in the stars, it's in the stars.

Everyone has an excuse for not seeing their doctor about colorectal cancer. However, every year 52,000 men and women die of colorectal cancer in this country alone. Two out of three of these people might be saved by early detection and treatment. Two out of three.

So what is your excuse? Today you have a new, simple, practical way of providing your doctor with a stool specimen on which he can perform the guaiac test. This can detect signs of colorectal cancer in its early stages before symptoms appear. While two out of three people can be saved. Ask your doctor about a guaiac test, and stop excusing your life away.
